

Consulting & Engineering

We design and build reliable, human-centered platforms—on time, on quality, ready to scale.

Engineering with You

Strategy

Engineering

Delivery

Core Capabilities

Artificial Intelligence

AI systems that deliver measurable business outcomes.

- Process automation & workflow optimization
- Custom copilots & intelligent agents
- RAG pipelines & document intelligence
- Predictive analytics & data insights

Web3 / Tokenization

Secure blockchain infrastructure for real-world asset digitization.

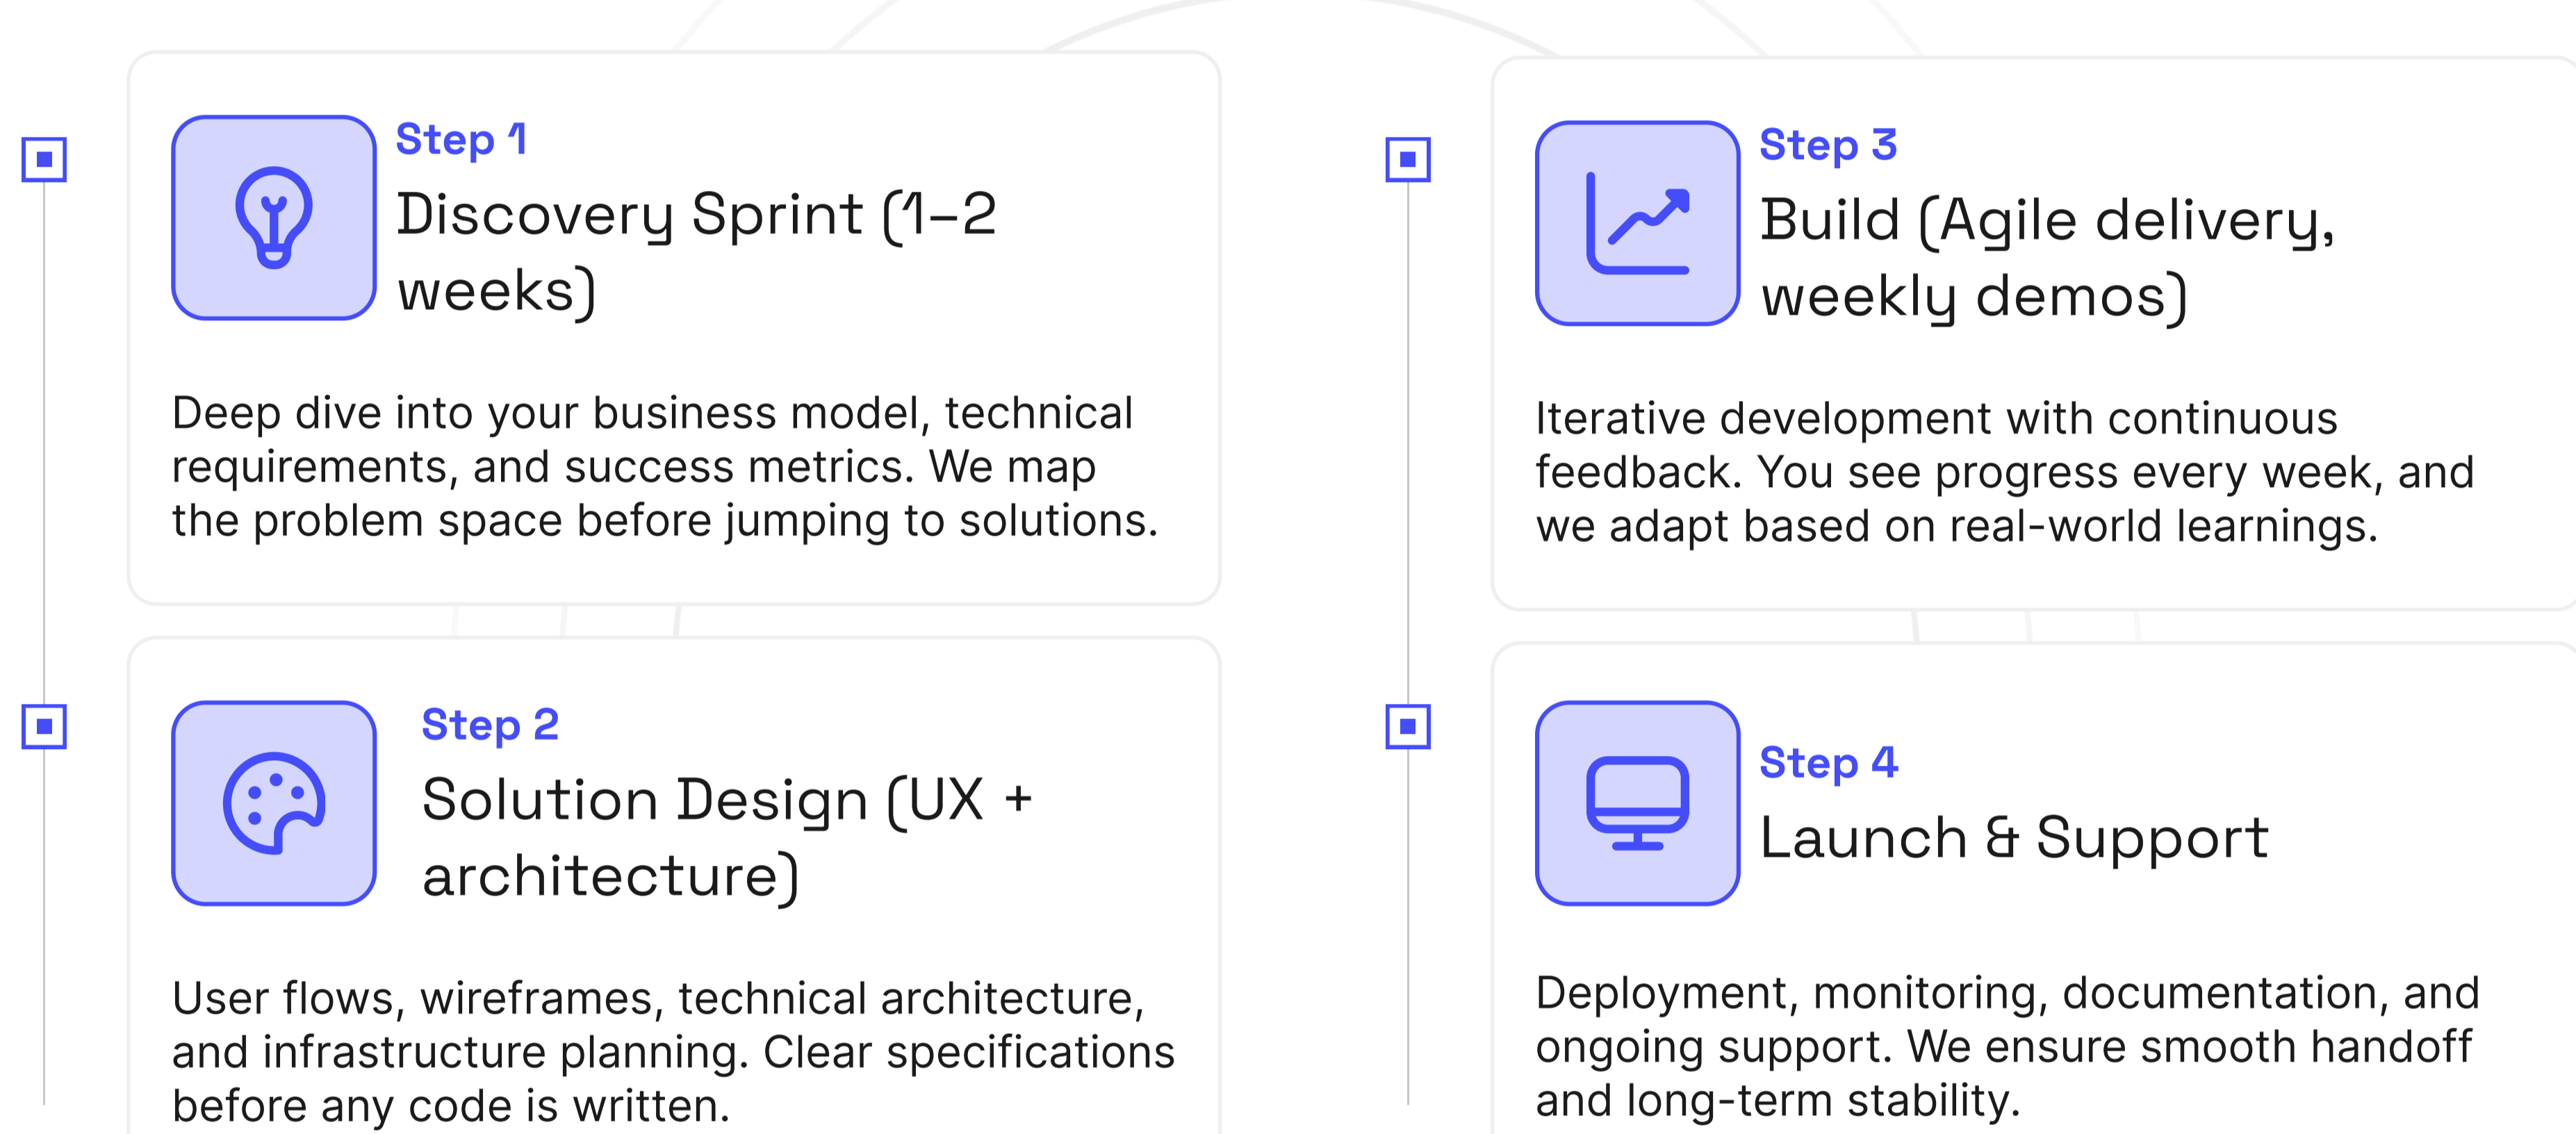

- RWA tokenization & compliance flows
- Smart contract development & audits
- Wallet integrations & custody solutions
- NFT marketplaces & DeFi protocols

Product Delivery

Full-stack development with enterprise-grade architecture.

- Web & mobile MVP development
- Scalable cloud architecture (AWS/GCP)
- CI/CD pipelines & deployment automation
- Ongoing maintenance & optimization

How We Work

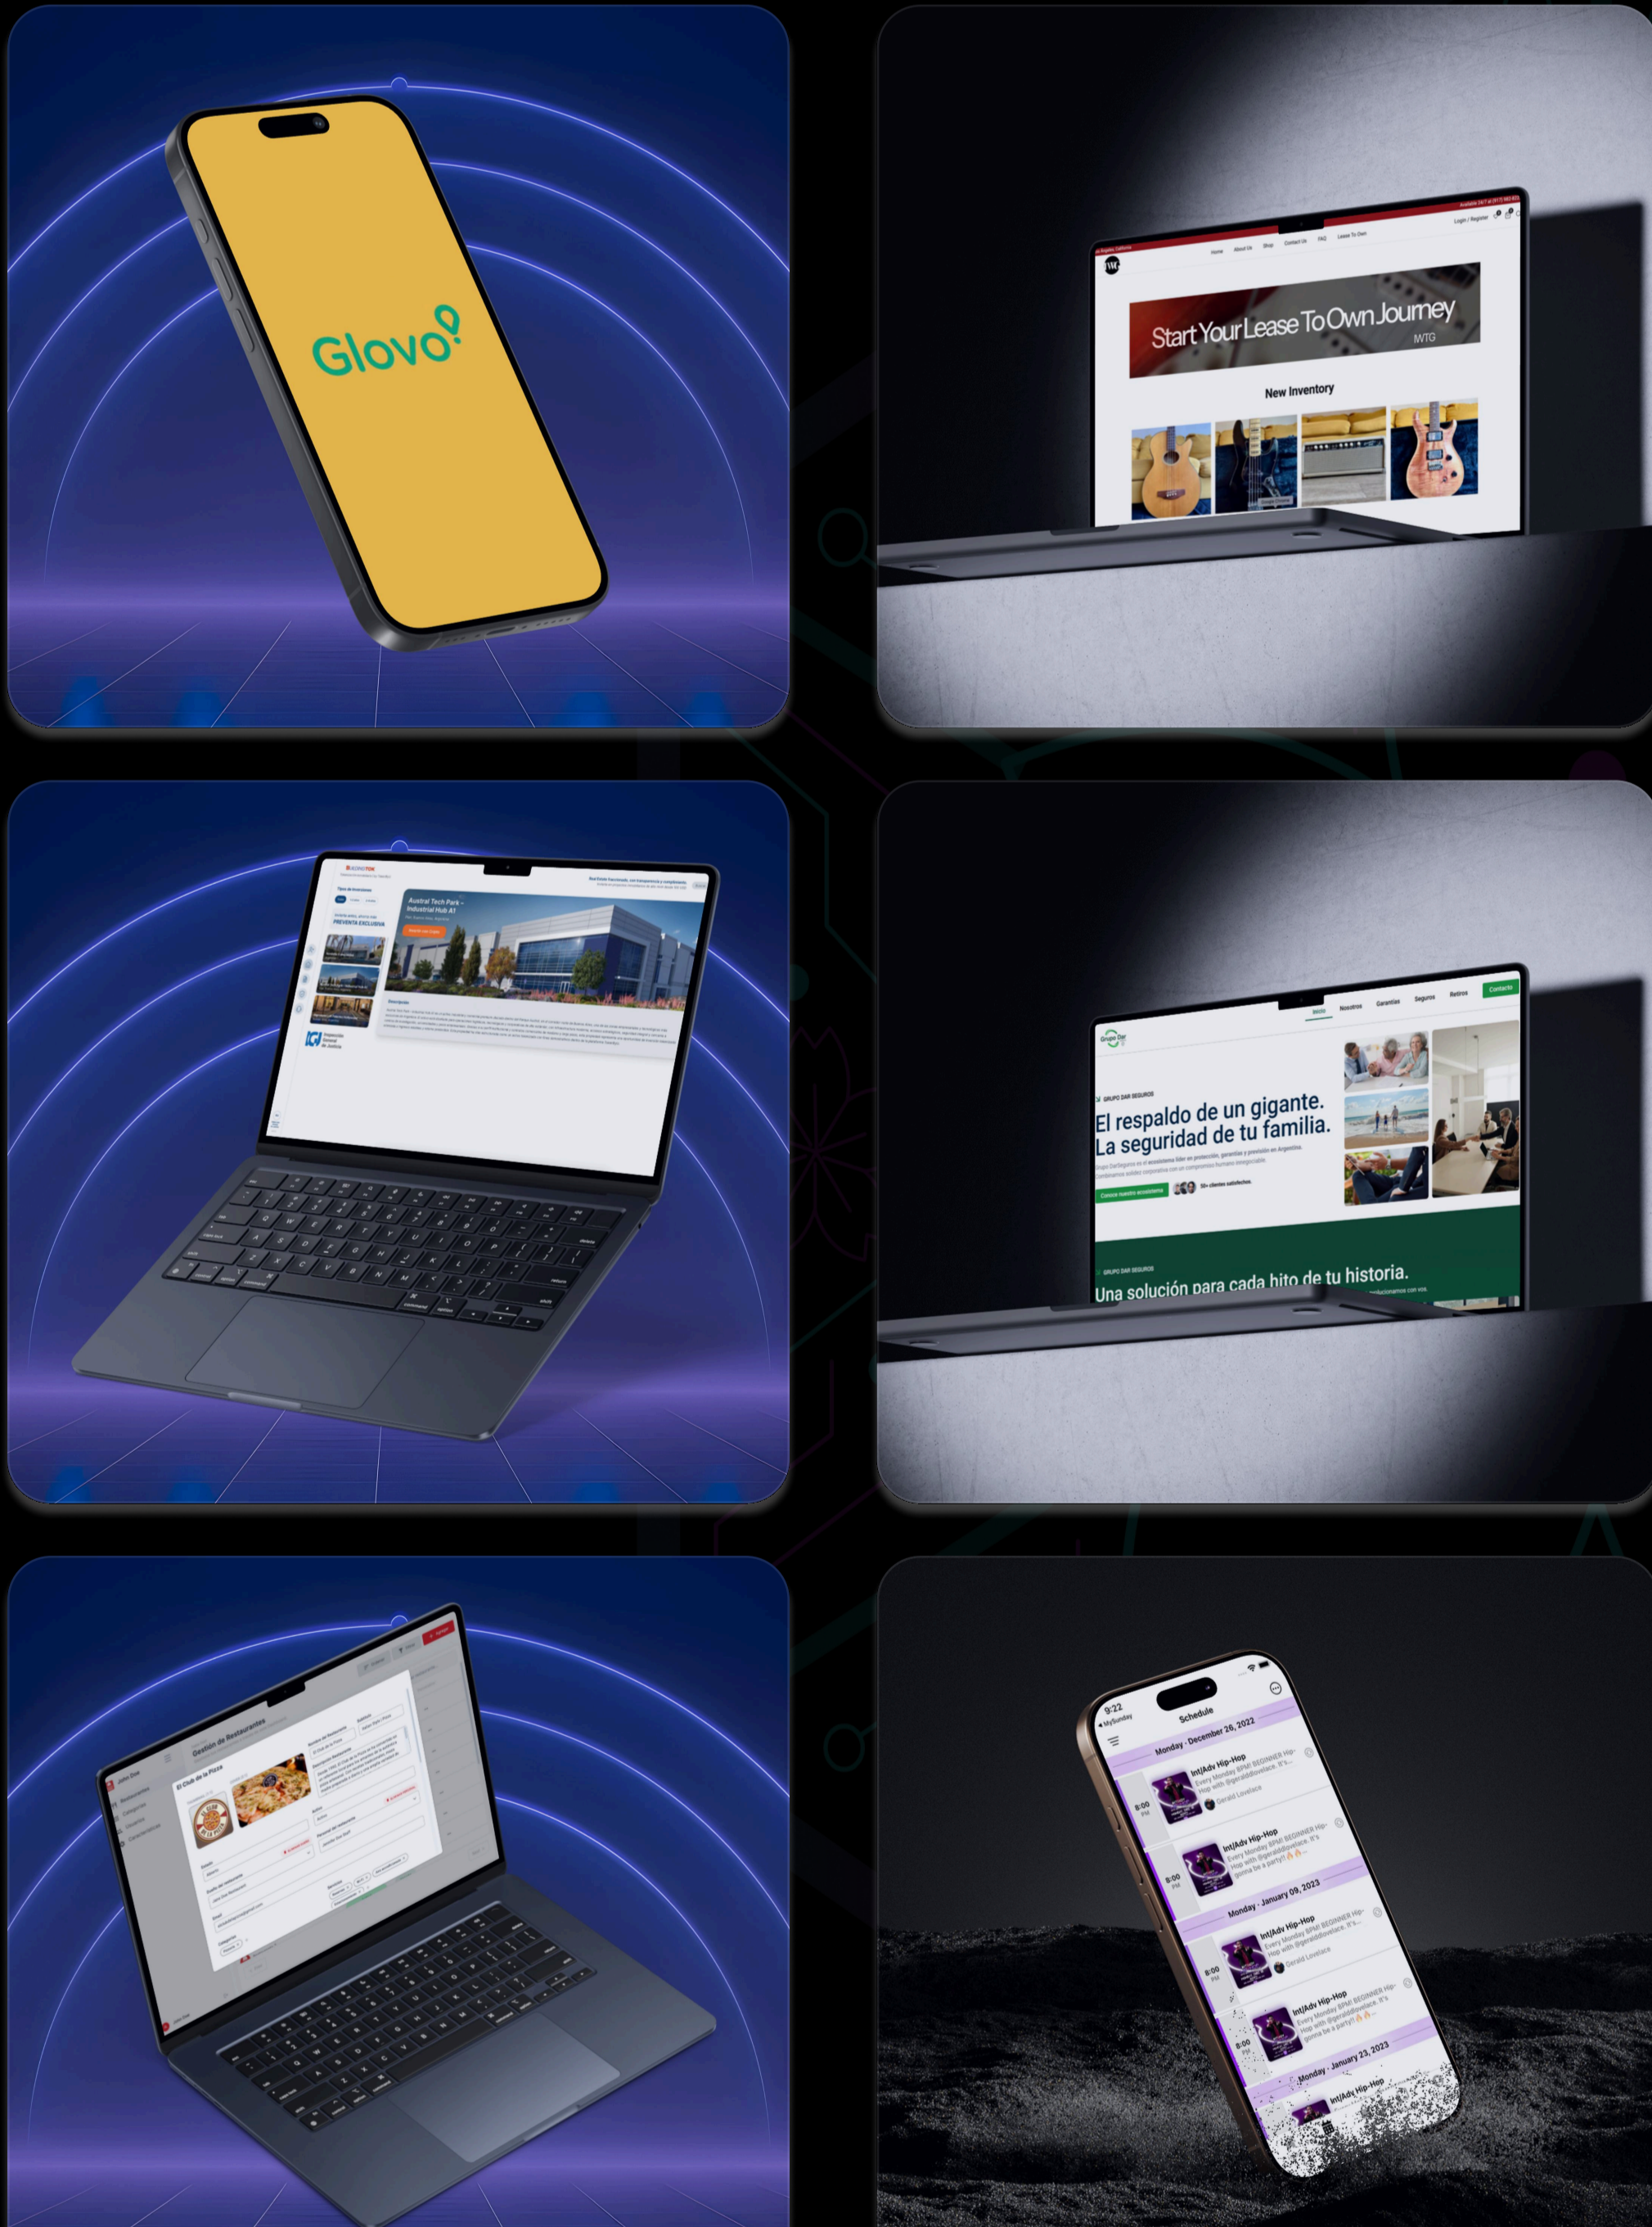

8-12 weeks Typical MVP Weekly Demos 100% Documentation Ongoing Support

AI-Powered Automation and Data Solutions for Modern Businesses

<p>RWA Tokenization Platform</p> <p>End-to-end asset digitization platform with KYC/AML compliance and investor portal.</p>	<p>Multi-Chain Wallet Integration</p> <p>Secure wallet service supporting EVM and Solana with custody-grade security.</p>	<p>AI Workflow Automation</p> <p>Reduced manual processing time by 80% through intelligent document analysis and routing.</p>
<p>Enterprise AI Copilot</p> <p>Custom LLM-powered assistant with RAG integration for internal knowledge base.</p>	<p>Payment Processing Platform</p> <p>Scalable payments infrastructure handling \$10M+ monthly transaction volume.</p>	<p>Mobility Platform</p> <p>B2B marketplace connecting fleet operators with enterprise customers across 12 cities.</p>

Trusted by

AI
LLMs, RAG, Agents, Automation

WEB3
EVM, Solana, Smart Contracts, Wallets, ETH, RWA

DELIVERY
React, Node, Spring Boot, Swift, JAVA, NEXT.js, AWS, Figma

Meet the CEO

Fernando Lepore
Founder & CEO

Fernando Lepore is the Founder & CEO of HAKO Software, and an Automotive Engineer with 16+ years of experience building complex systems and leading high-impact technical initiatives. He brings a structured, engineering-first mindset to every product—combining precision, reliability, and a deep passion for how systems work end-to-end.

Under his leadership, HAKO Software partners with founders and small businesses to turn ideas into scalable web and mobile products—blending AI and modern software development with clear strategy and disciplined execution. Fernando acts as the bridge between business and engineering, translating goals into actionable roadmaps while staying close to the build to ensure quality and outcomes.

Before HAKO, Fernando worked at Mercedes-Benz and Techint, where he developed a strong foundation in process, performance, and operational excellence. Today, he remains hands-on across projects—collaborating closely with clients and development teams, and adding a final layer of detail and polish that reflects his standard for craft.
